CROSSOVER LADDER

EN 14122-4 : 2016

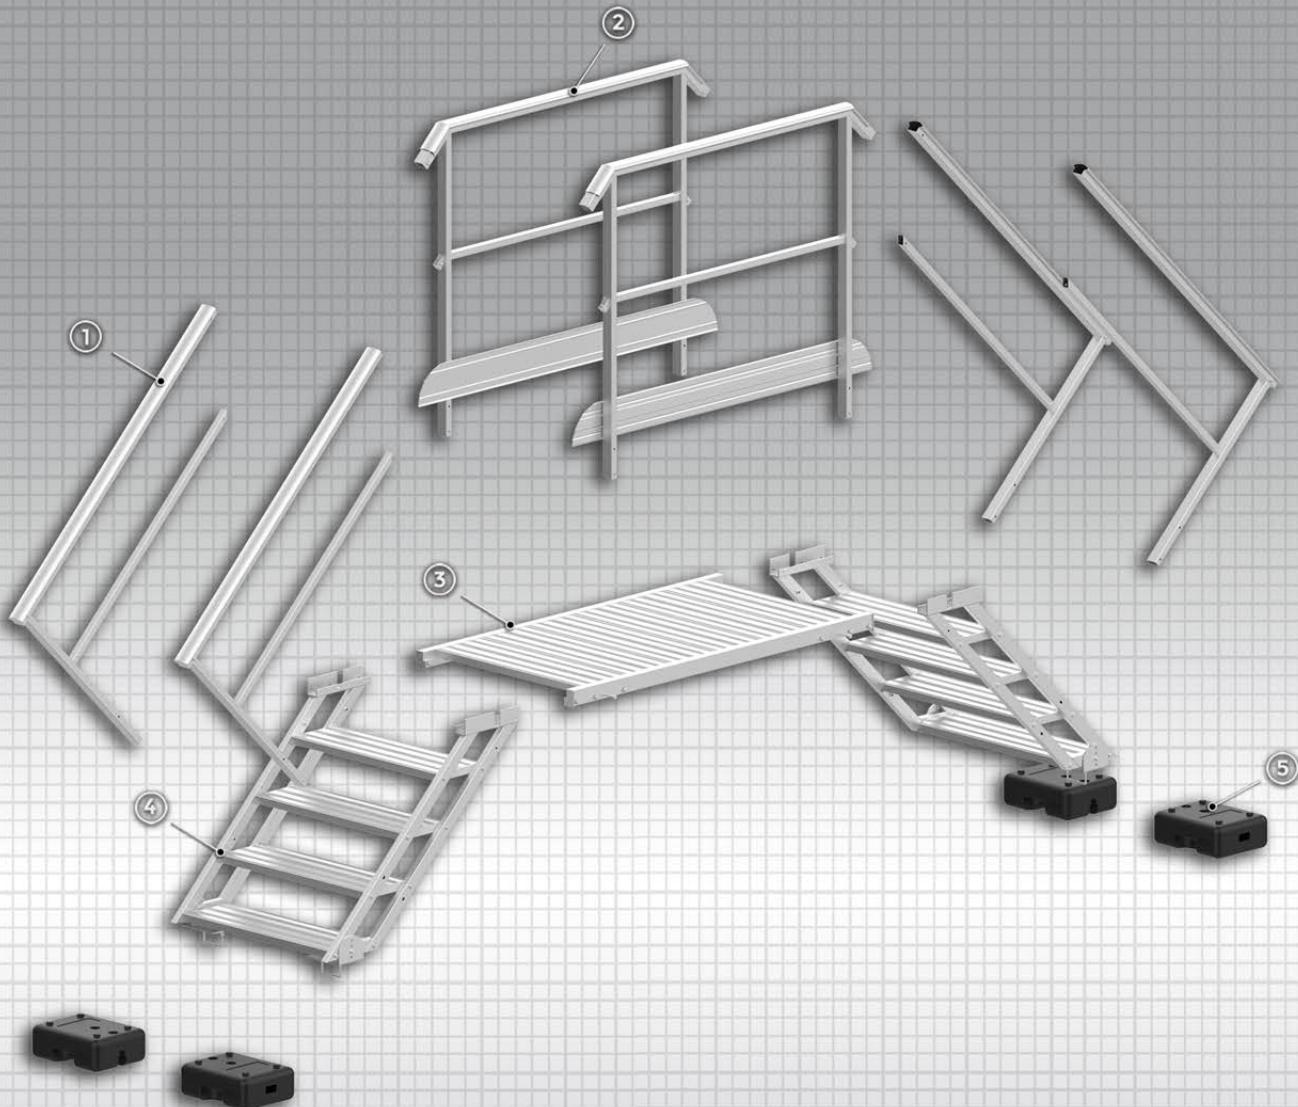

Crossover ladders can help get people up and over busy work areas, heavy traffic, danger zones and other obstacles or hazards. Select a crossover ladder with perforated or serrated steps and platforms to help improve footing and prevent slips and falls.

* These values will be different due to the number of steps (2-8 steps)

Number of steps	Platform height	Over all dimensions
2	540	2340 x 1700
3	740	2740 x 1900
4	940	3140 x 2100
5	1140	3540 x 2300
6	1340	3940 x 2500
7	1540	4340 x 2700
8	1740	4740 x 2900

** If adopted in a length of 1500mm platform, the value should be 1050mm

DIMENSIONS

① Stair guardrail

Clear space between railings and stringer is 500mm

③ Platform

Optional: 1000mm/1500mm

⑤ Counter weight

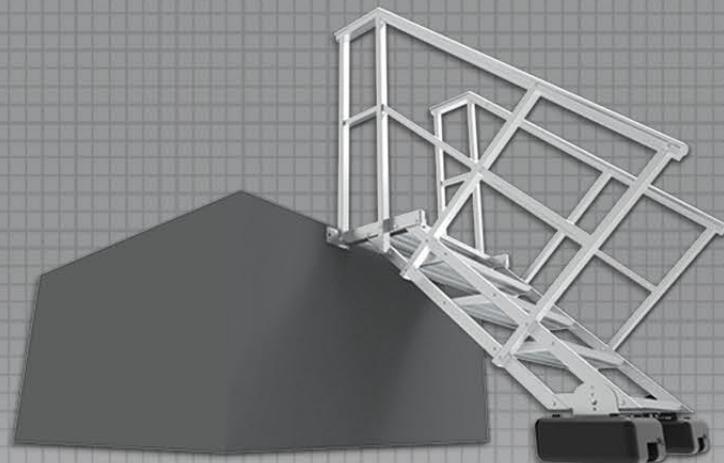

25KG, HDPE shell, concrete filled in

② Platform guardrail

Height 1100mm, length, apply to platform size

④ Stair modular

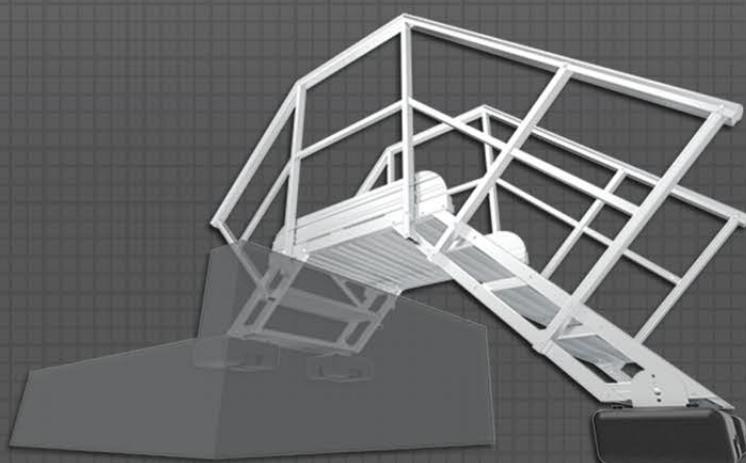

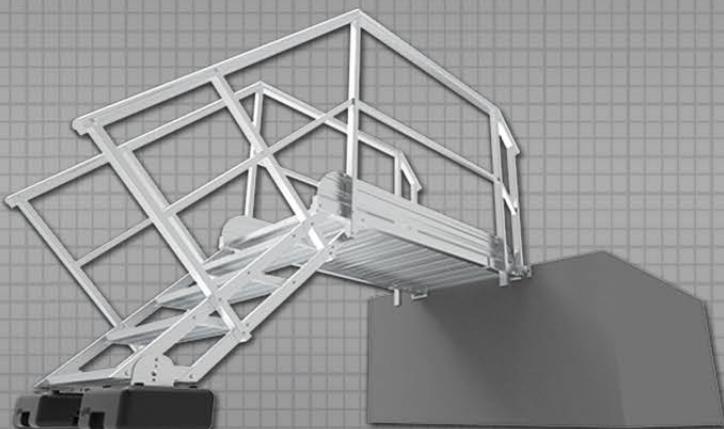

Optional: 2 steps to 8 steps ladder modulars.

**SHIPS LADDER**

Simplest way to get on higher level, number of steps can be customized

INCLINED FIXED LADDER WITH WALKWAYS

Perforable way to get on higher level when there's pipeline or obstacle underneath the walkways, number of steps can be customized.

**CROSSOVER LADDER**

A security way to cross over a parapet or obstacles and reach different level, number of steps can be customized.
